SUMMARY

UI/UX & Product Designer with 1+ year of freelance experience across fintech, health, fitness and sports platforms, backed by 3 years of **enterprise** SAP work at Wipro (Whirlpool, Electrolux, Viskase). I own the full design cycle in Figma, from user research and wireframing to rapid prototyping and developer handoff. My work includes a multi-role sports booking platform, a 45+ screen health app tested with users, and a 17-screen payday loan onboarding built around trust. My background in complex **B2B workflows** shapes how I design enterprise and multi-step products.

SKILLS

UX and Research — User Research, User Interviews, Personas, Journey Mapping, Usability Testing, Heuristic Evaluation, Competitive Analysis, Affinity Mapping, WCAG 2.1
Design — Wireframing, Rapid Prototyping, Interaction Design, Information Architecture, User Flows, Design Systems, Visual Design
Enterprise & Teamwork — Enterprise UX, SAP, B2B Dashboards, Role-based UX, Stakeholder Alignment, Cross-functional Collaboration, Agile
Tools — Figma, Miro, Notion, Spline, Photoshop, Survey Monkey

EXPERIENCE

Freelance, *UI/UX & Product Designer* 06/2025 – Present | Remote
- Designed **17** onboarding and trust-building flow for a **payday lending app**, simplifying verification, clarifying information hierarchy and adding progress indicators to reduce user anxiety and drop-off. Tested with 5 users, 4 completed unaided.
- Led end-to-end UX for a **sports matchmaking and venue-booking platform (sports dating app)** with three role-based experiences: a player app for creating matches and tournaments, messaging partners and booking nearby venues, an admin dashboard, and a venue-owner portal, with profile-specific login for each. I interviewed users on trust and safety concerns before redesigning key screens to make early interactions feel safer.
- Owned research-to-handoff design for a **health and fitness tracking app** covering vitals, activity logging and progress visualization, building personas from **15+ interviews**, mapping user journeys and delivering high-fidelity designs with developer-ready specs.

Ikarus 3D, *3D Visualization & Design Collaborator(Intern)* 06/2024 – 10/2024 | Mohali, Punjab
- Designed AR/VR-ready 3D assets for **spatial interfaces**, working from product and dev specs and building for how users view and interact with objects in **3D space.**
- Joined prototype design reviews with product and dev teams and revised assets across agile sprints based on feedback, the same critique-and-iterate loop I now use in UX.

Wipro Technologies Ltd, *Associate SAP Consultant* 05/2019 – 05/2022 | Pune, Maharashtra
- Mapped **end-to-end business workflows** (plan, produce, confirm, receive) for 3 global manufacturers (**Whirlpool, Electrolux, Viskase**) into user journeys and process flows, so every screen supported a clear step.
- Studied how planners, supervisors and plant operators at 3 global manufacturers used **complex B2B software** to run their daily work, then shaped the system around each role's tasks and decisions.
- Mapped **end-to-end business workflows** (plan, produce, confirm, receive) into user journeys and process flows, so every screen supported a clear step in the chain.
- Ran requirement workshops with business owners, plant teams and IT across **20+ implementation cycles**, balancing competing needs into one agreed design before build.
- Observed users on **SAP GUI during UAT** and training, and recorded where they hesitated, made errors or used workarounds. These observations are what moved me into **UX design.**
- Learned how enterprise products work as a business: role-based access, approvals, compliance, data accuracy and the cost of an error that spreads downstream.

PROJECTS

RupeeEase Onboarding UX, *Reducing Drop-off Rates*
- Redesigned a **17**-screen **payday loan onboarding across 4 stages** (Hook, Verify, Your Details, Get Funded) to cut early drop-off and build trust: a soft eligibility check comes before **KYC** so users see their chances before sharing sensitive documents, and dual progress indicators, granular consent and **RBI-aligned disclosures** keep them informed at each step.

TracMe - Health, Fitness & Nutrition App
- Unified vitals, fitness and nutrition tracking in one app across **45+ screens**, built from personas and journey maps, so users no longer juggle separate apps.
- Tested with **5 users** over iterative rounds and designed to **WCAG 2.1.**
- behance.net/gallery/230267989/Health-Fitness-App-TracMe-App

Momentum: Offline Habits, Focus and Productivity App, *Solo Product in development Phase for Android Users*
- Designing and building a **fully offline habit and focus app**, from PRD and design system to a working Android build in Android Studio and Antigravity, for users put off by subscriptions and connectivity-dependent trackers.

Snapdeal: Ecommerce Redesign
- Audited the live app, found fragmented navigation and inconsistent visual hierarchy along the path to purchase, and redesigned **25** screens across 5 core flows (**home, search, Categories, cart, checkout**) in Figma, with a reusable component library so new features can scale without redesigning from scratch.

EDUCATION

Executive PG in UI/UX Design, *iHub Divya Sampark, IIT Roorkee* 01/2025 – 05/2025
UX Research, Interaction Design, Design Systems, Prototyping, Figma, Accessibility, Design Thinking.

MA in Multimedia, *IACG, JNAFAU, Hyderabad* 06/2022 – 04/2024

B.Tech in Computer Science, *ITER College, SOA University, Bhubaneswar* 08/2015 – 05/2019
